# 4. МЕТОДИЧЕСКИЕ МАТЕРИАЛЫ, ОПРЕДЕЛЯЮЩИЕ ПРОЦЕДУРЫ ОЦЕНИВАНИЯ РЕЗУЛЬТАТОВ ОБУЧЕНИЯ

#### а. Индивидуальный опрос

Устный опрос - наиболее распространенный метод контроля знаний учащихся. При устном опросе устанавливается непосредственный контакт между преподавателем и учащимся, в процессе которого преподаватель получает широкие возможности для изучения индивидуальных возможностей усвоения учащимися учебного материала. Устный опрос требует от преподавателя предварительной подготовки: тщательного отбора содержания, всестороннего продумывания вопросов, задач и примеров, которые будут предложены, путей активизации деятельности всех учащихся группы в процессе проверки, создания на занятии деловой и доброжелательной обстановки.

Опрос – это хорошо известная, широко распространенная форма контроля, вариант текущей проверки, органически связанной с ходом урока. Она является наиболее распространенной и адекватной формой контроля знаний учащихся. Основу устного контроля составляет монологическое высказывание учащегося или вопросно-ответная форма – беседа, в которой преподаватель ставит вопросы и ожидает ответа учащегося. Это может быть и рассказ студента по определенной теме, а также его объяснение или сообщение.

С помощью опроса можно охватить проверкой одновременно всех учащихся группы, интенсивно активизировать их мышление, память, внимание, ускорять речевую реакцию, обучающий эффект, а также опрос дает возможность оценивать (поставить отметки) за один и тот же отрезок времени всех или большинство учащихся группы. При фронтальном контроле все учащиеся находятся в напряжении, так как знают, что их в любую минуту могут вызвать, поэтому их внимание сосредоточено, а мысли сконцентрированы вокруг той работы, которая ведется в группе.

#### **b.** Тест

Тест – это стандартизированная форма контроля, направленная на проверку владения терминологическим аппаратом, современными информационными технологиями и конкретными знаниями в области фундаментальных и прикладных дисциплин.

Тест состоит из небольшого количества элементарных задач; может предоставлять возможность выбора из перечня ответов; занимает часть учебного занятия (10–30 минут); правильные решения разбираются на том же или следующем занятии; частота тестирования определяется преподавателем.

Существуют некоторые основные положения, которых необходимо придерживаться при подготовке материалов для тестового контроля:

- 1. Нельзя включать ответы, неправильность которых на момент тестирования не может быть обоснована учащимися.
- 2. Неправильные ответы должны конструироваться на основе типичных ошибок и должны быть правдоподобными.
- 3. Правильные ответы среди всех предлагаемых ответов должны размещаться в случайном порядке.
- 4. Тестовые вопросы не должны повторять формулировки учебника или лекционного материала.
- 5. Ответы на одни тестовые задания не должны быть подсказками для ответов на другие.
  - 6. Вопросы не должны содержать "ловушки".

#### с. Презентация

Одной из форм финального контроля выполнения самостоятельного задания может выступить презентация. В данном случае презентация будет носить не только информативный, познавательный характер, но и позволит оценить проделанную работу одновременно и преподавателю, и сокурсникам.

Презентация как форма контроля может содержать отчет о работе над проектом либо информацию, полученную в ходе исследования. Так как цель презентации - донести до аудитории полноценные сведения в удобной для восприятия форме, то необходимо тщательно продумать, что и как представлять слушателям. Презентация должна быть хорошо спланирована и подготовлена. Для этого необходимо иметь сюжет, сценарий и структуру.

Удобнее всего использовать компьютерную (мультимедийную) презентацию, так как она требует минимума оборудования (компьютер и мультимедийный проектор) и затрат времени и финансов. Работа над созданием презентации обычно не занимает много времени, потому что использование программы Microsoft PowerPoint делает этот процесс легким и быстрым.

В этом случае презентация - это набор слайдов, содержащих текстовую информацию, фотографии, видеоролики, графики и таблицы с возможностью использования компьютерных спецэффектов и звукового ряда. Такая презентация не только информативна, но и зрелищна. Но при подготовке необходимо четко решить, какова цель работы - представить данные или поразить зрителей спецэффектами. Как отчет о проделанной работе, это скорее первое. При создании презентации ее всегда нужно рассматривать с точки зрения зрителя, слушателя из зала. Именно с этой позиции решаются вопросы фона слайда, стиля и цвета шрифта и его размера, количество и размер фотографий и скорость их показа.

Студенты могут подготовить презентацию-отчет в одном из двух вариантов: только для преподавателя и для аудитории. В первом случае презентация должна содержать всю информацию, так как преподаватель может проверять работу без присутствия авторов. Во втором случае презентация может содержать только те данные, которые трудно воспринимаются на слух (незнакомые географические названия, имена и фамилии людей, даты, экономические показатели), а также фото-, видео- и аудиоматериалы, так как студенты сами будут показывать свою работу и рассказывать о своем исследовании.
